Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 January 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 6, 10, 11, and 15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,527,203 in view of Goenka et al.

Claims 1-10 of the '203 patent teach all the limitations of the claims except for a rectangular dispensing opening. However, Goenka et al. discloses a liquid spraying dispensing gun 12 with nozzle 10 having a rectangular dispensing opening 24 with a pair of short side width edges (not numbered) and a pair of long side long edges 103, the long side edges 103 are tapered from sides 100 and maintained a constant length throughout (see figures 1 and 2). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of the '203 patent with a rectangular dispensing opening as suggested by Goenka. Doing so would provide a better way to deposit spraying material in well-defined areas (see column 1, lines 4-48).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 6, 10, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Finn in view of Goenka et al.

Finn teaches all the limitations of the claims except for However, Goenka et al. discloses a liquid spraying dispensing gun 12 with nozzle 10 having a rectangular dispensing opening 24 with a pair of short side width edges (not numbered) and a pair of long side long edges 103, the long side edges 103 are tapered from sides 100 and maintained a constant length throughout (see figures 1 and 2). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Finn with a rectangular dispensing opening as suggested by Goenka. Doing so would provide a better way to deposit spraying material in well-defined areas (see column 1, lines 4-48).

Allowable Subject Matter

5. Claims 2-5, 7-9, 12-14, and 16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect a liquid spraying dispensing gun having a rectangular dispensing opening: Brooks, and Luegering.
